

We Make Your Organization Mobile.

Build community, keep parents informed and communicate effectively with push notifications, news, and calendars. Reduce calls to the office by 40%.

Quick Turnaround

In 2-3 weeks, BlueTreeApps can have your app live and in the hands of your community.

Welcoming Support

Only minimal training is necessary for you to maintain the app. BlueTreeApps is here with US-based, knowledgeable support, whenever you need us.

Push Notifications

Users prefer push notifications over robo calls, emails, social media and text messages. Your message delivered with your logo directly to their smart phone.

Mobile Popularity

People of all ages access more information with mobile devices than ever before. You want to deliver this information consistently, accurately, and with the same branding on both your website and a mobile device.

What You Need

We provide unlimited functionality — notifications, news, calendar, directories, photos, videos, donations, lunch menu, link to student and parent portals, sports and clubs, and absence and volunteer forms.

Easy Setup

Select from over 20 features and our staff will design and develop your organization's app.

Cost Effective

A powerful and robust platform on a budget any organization can handle.

Maintenance Free

No need to worry about the latest smartphone updates — we take care of it all.

Integration

We can work with your existing website to integrate information directly into the app. We play nice with WordPress and other CMS platforms as well.

Customized

We can tailor your app to meet any organization's needs with several icon sets or custom icons can be used. Singular or multiple images on home screen created with professional inhouse graphic design team. All included.

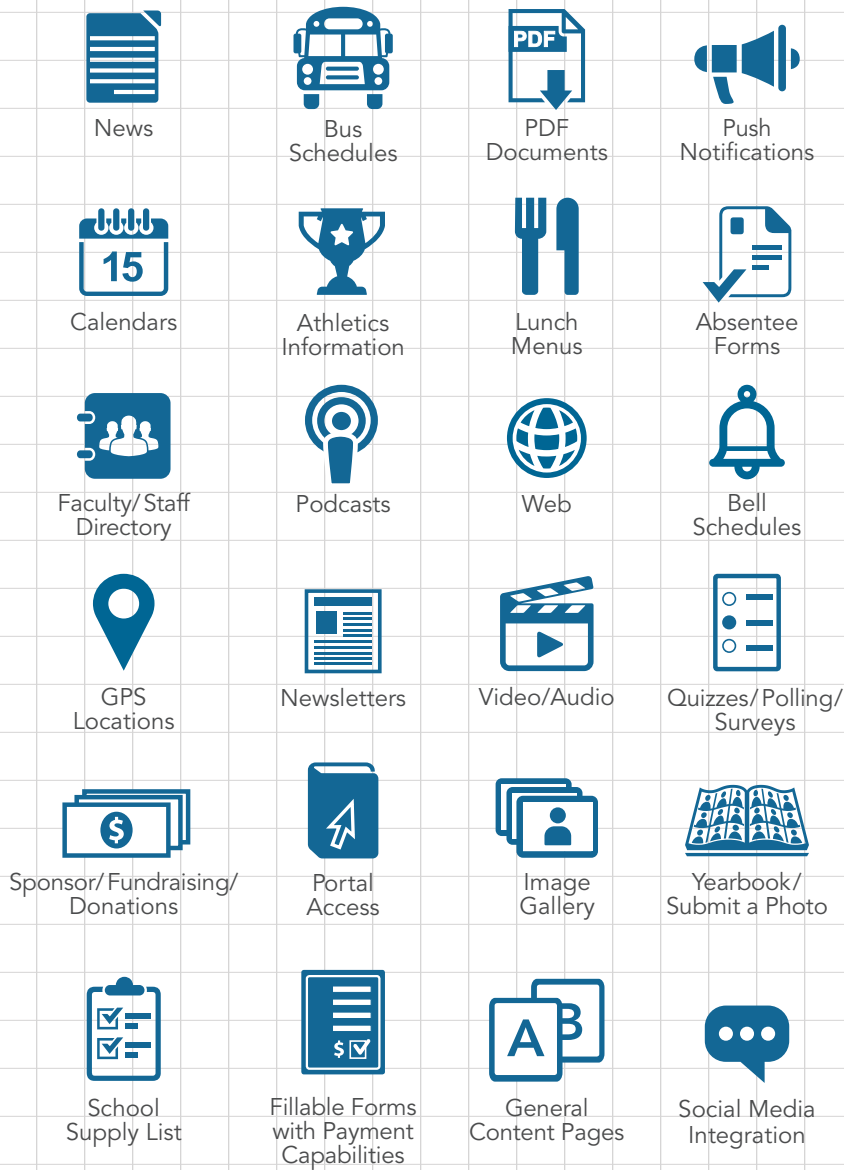

Built for Organizations

We specialize in apps for organizations. Our platform and features are specifically designed and built for organizations.

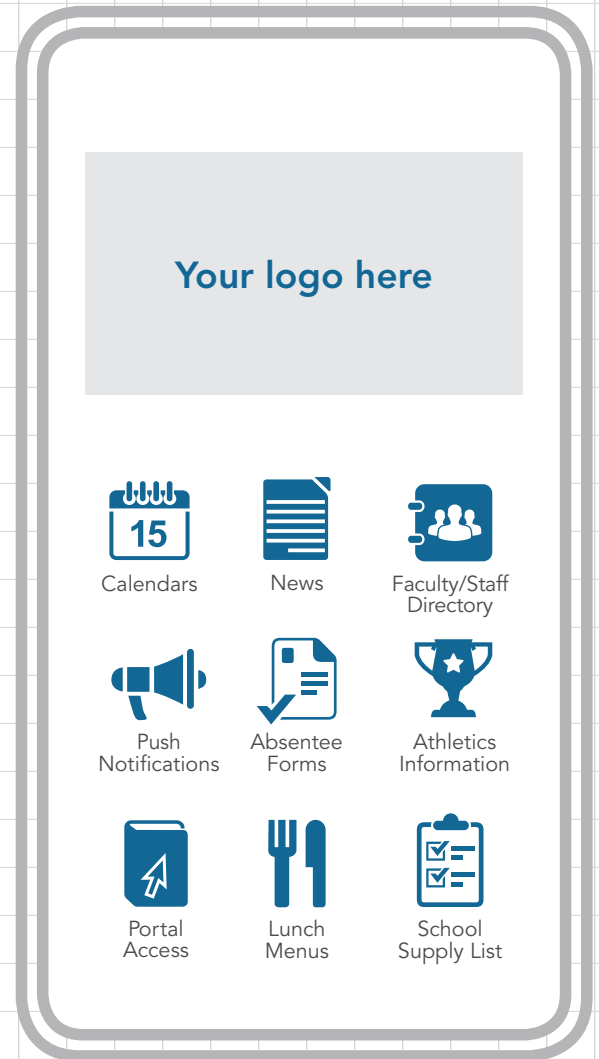

We design websites, too! Want to use only one vendor? Our intuitive and flexible Content Management System can power both an app and a website.
